Stop, Collaborate, and Listen

- Slack (nifty free version)
- Dropbox
- Microsoft Teams, 365
- Github
- Google Drive, Docs, Collab
- And many others

Slack

- Instant messaging service
- “Freemium”- free version available, paid version with more features
- Used as community platform

Image credit: Slack

Dropbox

- Share and save things to the cloud.
- Access from anywhere!
- Integrates with other tools.
- Not infinite free space.

Image credit: Dropbox

Microsoft Teams

- Pros: Productivity, Easy Implementation with other Microsoft stuff, chat, channels
- Cons: Confusing file structures, lack of authority control, limited flexibility

Image credit: Microsoft

Github

- Online software development platform
- Used for storing, tracking, and collaborating on software projects
- Can be used to host and share other files, like these course materials
- Easy method for sharing code files and collaborate on open source projects

Image credit: Github

OBSERVATIONES SIDEREAE

ex parte scilicet Orientali duæ aderant Stellæ, una vero Occasum versus. Orientalior atque Occidentalis, reliqua paulo maiores apparabant, de distantia inter ipsas & Iouem minime sollicitus fui; fixæ enim ut diximus primo creditæ fuerunt, cum autem die octaua, nescio quo Fato ductus, ad inspectionem eandem reuersus essem, longè aliam cõstitutionem reperi; erant enim tres Stellulæ occidentales omnes à Ioue, atque inter se quam superiori nocte viciniore, paribusque interstitijs mutuò dissepatae, veluti apposita præfert delineatio. Hic licet ad mutuam Stellarum appropinquationem minime cogitationem appulsem,

Ori. ○ * * * Occ.

exitate tamen capie, quoniam pacto Iuppiter ab omnibus prædictis huius posset orientior reperiri, cum à binis ex illis prædie occidentalis fuisset: ac proinde veritus sum ne forte, secus à computo astronomico, directus foret, ac propterea motu proprio Stellas illas anteuerisset: quapropter maximo cum desiderio sequentem expectaui noctem; verum à spe frustratus fui, nubibus enim vndiquaque obductum fuit cælum.

At die decima apparuerunt Stellæ in eiusmodi ad Iouem positu: duæ enim tantum, & orientales ambe

Ori. * * ○ Occ.

aderant, tertia, ut opinatus fui, sub Ioue latitante. Erant pariter veluti antea in eadem recta cum Ioue, ac iuxta Zodiaci longitudinem adamussim locatæ. Hæc cum vidissem, cumque mutationes cõsimiles in Ioue nulla

RECENS HABITAE.

18

nulla ratione reponi posse intelligerem, atque insuper spectatas Stellas semper easdem fuisse cognoscerem, (nullæ enim aliæ, aut præcedentes, aut consequentes intra magnum intervallum iuxta longitudinem Zodiaci aderant) iam ambiguitatem in admirationem permutans, apparentem commutationem non in Ioue, sed in Stellis adnotatis repositâ esse comperi; ac proinde oculatè, & scrupulosè magis deinceps obseruandum fore sum ratus.

Die itaque vndecima eiusmodi cõstitutionem vidi:

Ori. * * ○ Occ.

Stellas scilicet tantum duas orientales; quarum media triplo distabat à Ioue, quam ab orientiori: eratque orientior duplo seè maior reliqua, cum tamen antecedenti nocte æquales seè apparuissent. Statutum ideo, omnique procul dubio à me decretum fuit, tres in cœlis adesse Stellas vagantes circa Iouem, instar Veneris, atque Mercurij circa Solem: quod tandem luce meridiana clarius in alijs postmodum compluribus inspectionibus obseruatum est; ac non tantum tres, verum quatuor esse vaga Sydera circa Iouem suas circinuationes obeuntia; quorum permutationes exactius consequenter obseruatas subsequens narratio ministrabit; interitua quoque inter ipsa per Perisicillum, superius explicata ratione, dimittitur sum: horas insuper obseruationum, præsertim cum plures in eadem nocte habitæ fuerunt appolui, adeo enim celeres horum Planetarum extant reuolutiones, ut horarias quoque differentias plerunque liceat accipere.

Die igitur duodecima, hora sequentis noctis prima hac ratione disposita Sydera vidi. Erat orientior

ABOUT

MY RESEARCH
IN 2 MINUTES

Welcome to Open Lab Notebooks

In a groundbreaking initiative, scientists around the world from Universities in Canada, France, Sweden, the UK, and the USA are starting to share their laboratory notebooks live, online. We believe that making our research, data, and protocols available on a day-to-day basis will generate scientific ideas and

We introduce our experiments at openlabnotebooks.org with links to experimental details

We provide all experimental details at zenodo.org

Jupyter Notebooks

Computers are good at consuming, producing and processing data. Humans, on the other hand, process the world through narratives. Thus, in order for data, and the computations that process and visualize that data, to be useful for humans, they must be embedded into a narrative - a computational narrative - that tells a story for a particular audience and context.

Perez, Fernando, and Brian E. Granger. "[Project Jupyter: Computational narratives as the engine of collaborative data science.](#)"

Image credit: Jupyter

Google Colaboratory (Colab)

- Internal branch of Jupyter that Google released for public use
- A variant of Jupyter, but also:
 - Has collaboration. Work together like in Google Docs!
 - Runs on the web < Easier to hop in and reproduce research
 - Included free computational resources from Google

Pair programming

- Pair programming is an agile software development technique in which two programmers work together at one workstation. One, the driver, writes code while the other, the observer or navigator, reviews each line of code as it is typed in. The two programmers switch roles frequently.
- While reviewing, the observer also considers the "strategic" direction of the work, coming up with ideas for improvements and likely future problems to address. This is intended to free the driver to focus all of their attention on the "tactical" aspects of completing the current task, using the observer as a safety net and guide.

Participation Activity #5 – Part 1

- Use Colab by copying this notebook
- https://colab.research.google.com/github/tensorflow/hub/blob/master/examples/colab/tf2_arbitrary_image_stylization.ipynb
- Upload a new image and convert (save to include in your report)

Image Credit: Wade Bishop, Google Colab

Participation Activity #5 - Part 2

- Pick one of the Ten Favourite Colab Notebooks or others if you know of others and work through another exercise
- Save a copy in DRIVE
- <https://github.com/firmai/awesome-google-colab>
- Upload a brief reflection into Canvas discussion board
